

ISST Publications Committee

Report to the Executive Board 21st April 2020

Committee members: Robert Brockman (Chair), Travis Atkinson, Chris Hayes, Lissa Parsonnet, Susan Simpson.

1. Several schema therapy authors have contacted the publications committee to discuss options for publishing their books. Many of these books have already been published in another language, and authors are keen to translate and publish them in English.
2. Rob Brockman recently met with Darren Reed from Pavilion. Darren expressed an interest in publishing several of these books. He has invited authors to submit first chapters in English for his consideration. Authors will need to organize the translation of their own manuscripts, as there is not a service currently available to assist with this process.
3. Darren is currently in the process of publishing Rosi Reubsaet's book on 'Phase Based Therapy' through Pavilion.
4. We are aware that Routledge will be publishing a new book on 'Creative Methods in Schema Therapy' by Heath & Startup (eds) in June 2020.
5. Susan and Rob have managed to secure a book contract with Cambridge University Press, titled 'Cambridge Guide to Schema Therapy'. This is part of a forthcoming series of approx. 8-9 books by Cambridge University Press based on a range of therapeutic models (e.g. '*Cambridge Guide to Cognitive Behavioural Therapy*'). The authors for the book will be: Rob Brockman, Susan Simpson, Chris Hayes, Remco van der Wijngaart, Matthew Smout. The final manuscript will be due in May 2021, with publication in early 2022.
